

Pilgrim Cove Camp has been operating for 85 years. How many times have you, members of your family, church or organization friends come back from camp with a great story of fun, adventure, learning or new friends?

If you've had a good experience at camp then we need you to be a Pilgrim Cove Booster or Ambassador.

Keep Pilgrim Cove Growing!

Boosters can roll up their sleeves and help with work days at camp, special projects that improve user experience, and supplement work of the Pilgrim Cove Foundation Board and Camp Manager in a variety of ways.

Ambassadors help raise capital funds to pay down the camp mortgage and add new facilities and features that improve and diversify the camp. Ambassadors go tell the camp story to help the Board and Camp Manager attract new or build up current user groups.

Where we've been. Churches and friends of outdoor group camping set out more than a decade ago to transform Pilgrim Cove Camp on Payette Lake, McCall, Idaho. The theme was and is: bringing the love of God to all people of all ages and abilities all year around. Remember what the Millennium Project did:

- Previously the camp was summer use only, 125

bunk capacity. Now the camp is four-season with over 125 summer and 75 winterized bunk spaces.

- Replaced the old kitchen that was facing State Health Department Compliance issues and limited seating tent dining hall with modern, safe, and full-capacity space.
- Added handicapped access lodging and restroom facilities.
- Added large, automatically watered lawn spaces for activities including a great sledding hill.
- Added camp-serving potable water and fire suppression water systems
- Now offer year-around conference, retreat, reunion, and wedding services not previously possible
- Procured capable snow removal, roadway, and waterfront maintenance equipment

Learning to paddle canoes

Night sledding

Keep Pilgrim Cove Growing!

Work Party fun: getting boats ready, setting up the old blue & white dining hall tent (oops, we don't have to do this any more!), roofing a cabin.

Help we need from you. Here are three important ways you can help Pilgrim Cove now.

- Share your best stories and photos about Pilgrim Cove Camp. These will help us communicate with churches, non-profit organizations, and families learn about what the camp has to offer. Check out the website, download our brochure then help us do a better marketing and sales job. About 70 percent of people who have come to know God say that camp experience is a major contributor.
- Volunteer to be a Pilgrim Cove Booster or Ambassador (or both!). Booster functions are projects at the camp like work days and focused upgrades that need time and your skills. Ambassador projects will help us expand this capital campaign, develop new programs and grant funding for camp, and target larger prospective user groups such as other denominations, universities, service clubs, youth organizations, and more.
- Make a generous annual donation or large single gift to the Millennium II campaign. Our goal is \$65,000 annually until we get the user base built up to self-sustaining operations. We've raised about \$11,000 of this goal for 2010-2011. Gifts are tax deductible. The main funding target is mortgage reduction. We do have some projects to improve camp user experience, such as upgrading and winterizing New Rice facilities and adding a fireplace to Alan Creech Lodge (couldn't afford these in the first Millennium round).

International Exchange Students - Winter

Children & youth camp - Summer

New Program Ideas

What camp, conference, retreat, or reunion ideas make sense to consider? Think about other outdoor camp and conference centers.

- Peace Village - multi-cultural, inter-faith, non-violent conflict resolution for middle school or high-school youth
- Learning - University-based conferences or classes like Executive MBA, Elder Hostel, gaining skills for mountain biking or cross-country skiing perhaps teamed with vendors
- Healthy living. Camps & conferences aimed at special groups such as diabetics, asthmatics, physical therapy, vegetarians
- Environmental camps and conferences to study, learn fresh job skills, see a mountain setting through four seasons.
